

## WHAT IS A "PLACE OF SAFETY"

A place of safety is a specific location designated by the bus driver or Transportation Department where students are to stand while the bus comes to a stop for pick-up or where students go and wait when unloading to ensure all students are accounted for before the bus moves. Most serious injuries occur during the loading/unloading of students because they are too close to the bus while it's in motion.

Each student will be assigned a place of safety at their bus stop and we ask that is where they wait for the bus and where they go to as they get off the bus to be counted by the driver before they drive away. Please support us in this effort to help keep your students safe.
